

## Polo Kayak K1 MODEL X

The **K1 Model X** was designed in collaboration with the French athletes: Christophe and Patrice Belat. It stands out from the other models in the market for their rigidity, speed and maneuverability.

Because it is produced in a single piece, it comes out perfectly of the mold which guarantees a greater resistance of the seams and edges. The outer seam is further reinforced with a black kevlar strap to ensure a better durability of the boat.
